1. Modules Overview

StayEase is a fictional hotel booking website. This project delivers a complete test plan and a forty-case test suite covering four modules: Search & Availability, Booking & Reservation, Payment & Checkout, and Account & Booking Management. Twelve functional requirements were defined across these four modules, and every one of the forty test cases is mapped back to a specific requirement, forming a full requirement traceability matrix.

2. Test Plan Summary

Objective

Verify that StayEase's core booking journey — searching for rooms, making a reservation, completing payment, and managing an account — works correctly, so guests can reliably book a hotel room without errors, double-bookings, or payment failures.

Scope

In scope: Search & Availability, Booking & Reservation, Payment & Checkout, and Account & Booking Management. Out of scope: the hotel partner/admin dashboard, the loyalty points program, and multi-language/multi-currency support, all of which belong to a separate system or a future release.

Approach & Entry/Exit Criteria

A combination of positive, negative, and boundary testing is applied across all four modules, with test cases prioritized High, Medium, or Low by business impact. Entry criteria: the staging build is deployed, all 40 test cases are written and reviewed, and test data is available. Exit criteria: all 40 test cases are executed, no open Critical/High defects remain, and at least 95% of test cases pass.

3. Test Suite Summary

The full 40-case test suite, with preconditions, steps, expected results, and execution status for every case, is provided in the accompanying spreadsheet (StayEase_Test_Plan_Suite.xlsx). The table below summarizes how the 40 cases are distributed across modules and priority levels.

Module	High	Medium	Low
Search & Availability	2	7	1
Booking & Reservation	3	6	1
Payment & Checkout	6	3	1
Account & Booking Mgmt	5	3	2
Total (40)	16	19	5

High-priority cases concentrate on payment (6 of 10 cases), login, and booking-conflict scenarios — the areas where a defect would most directly cost the business money or damage user trust — while lower-priority cases cover edge scenarios such as viewing an empty booking history.

4. Requirement Traceability Matrix

Each of the 12 requirements below is mapped to the test cases that verify it. The full matrix, with every test case ID listed against its requirement, is in the spreadsheet's "Traceability Matrix" sheet; a condensed view is shown here.

Req ID	Requirement	Module	Coverage
REQ-01	Search hotels by destination/city	Search	2
REQ-02	Filter by dates and guest count	Search	6
REQ-03	Show message when no rooms match	Search	1
REQ-04	Select room type and view details	Booking	3
REQ-05	Enter guest information for booking	Booking	3
REQ-06	Prevent double-booking of a room	Booking	3
REQ-07	Pay via card or digital wallet	Payment	4
REQ-08	Apply a valid promo code	Payment	4
REQ-09	Generate confirmation and invoice	Payment	2
REQ-10	Register and log into an account	Account	4
REQ-11	View booking history	Account	2
REQ-12	Cancel or modify a booking	Account	4

All 12 requirements have at least one covering test case, and every one of the 40 test cases traces back to exactly one requirement, giving full bidirectional traceability between requirements and tests.

5. Conclusion

This project delivers a complete, traceable test package for StayEase: a test plan with clear objectives, scope, and entry/exit criteria; a 40-case test suite spread across four modules and prioritized by business impact; and a full requirement traceability matrix confirming that every requirement is covered and every test case has a documented purpose. This structure gives a QA team confidence that testing effort is aligned with real requirements rather than arbitrary guesswork, and gives stakeholders a clear way to verify that nothing important was missed.

6. Practical Screenshots

This section is reserved for screenshots of the test plan, test suite, and traceability matrix sheets from the accompanying spreadsheet.

The screenshot shows a Google Sheets document titled "Requirement Traceability Matrix". The spreadsheet has columns A through T and rows 1 through 16. The data is organized as follows:

Req ID	Requirement	Module	Covering Test Case IDs	Coverage Count
REQ-01	The system shall allow users to search for hotels by destination only.	Search & Availability	TC_HB_001, TC_HB_002, TC_HB_010	3
REQ-02	The system shall allow users to filter results by check-in/check-out dates and guest count.	Search & Availability	TC_HB_004, TC_HB_005, TC_HB_006, TC_HB_007, TC_HB_008, TC_HB_009	6
REQ-03	The system shall display a clear message when no rooms match the search criteria.	Search & Availability	TC_HB_003	1
REQ-04	The system shall allow users to select a room type and view its details before booking.	Booking & Reservation	TC_HB_011, TC_HB_018, TC_HB_019	3
REQ-05	The system shall allow users to enter guest information required to complete a booking.	Booking & Reservation	TC_HB_012, TC_HB_013, TC_HB_014, TC_HB_015	4
REQ-06	The system shall prevent double-booking of the same room for overlapping dates.	Booking & Reservation	TC_HB_016, TC_HB_017, TC_HB_020	3
REQ-07	The system shall allow users to pay via credit/debit card or digital wallet.	Payment & Checkout	TC_HB_021, TC_HB_022, TC_HB_023, TC_HB_024	4
REQ-08	The system shall allow users to apply a valid promo code at checkout.	Payment & Checkout	TC_HB_025, TC_HB_026, TC_HB_027, TC_HB_028	4
REQ-09	The system shall generate a booking confirmation and invoice after successful payment.	Payment & Checkout	TC_HB_029, TC_HB_030	2
REQ-10	The system shall allow users to register and log into their account.	Account & Booking Mgmt	TC_HB_031, TC_HB_032, TC_HB_033, TC_HB_034	4
REQ-11	The system shall allow logged-in users to view their booking history.	Account & Booking Mgmt	TC_HB_035, TC_HB_036	2
REQ-12	The system shall allow users to cancel or modify a booking within the allowed window.	Account & Booking Mgmt	TC_HB_037, TC_HB_038, TC_HB_039, TC_HB_040	4

Test Plan sheet — objective, scope, approach, entry/exit criteria.

The screenshot shows a Google Sheets document titled "Test Suite". The spreadsheet has columns A through S and rows 1 through 41. The data is organized as follows:

Test ID	Module	Title	Req ID	Priority	Precondition	Steps	Expected Result	Status
TC_HB_34	Account & Booking Mgmt	Log in with an incorrect password	REQ-10	High	StayEase homepage is loaded; for logged-in scenarios, a test account exists.	Enter correct email, wrong password; click Login.	Error: incorrect email or password.	Passed
TC_HB_35	Account & Booking Mgmt	View booking history after logging in	REQ-11	Medium	StayEase homepage is loaded; for logged-in scenarios, a test account exists.	Log in; navigate to Booking History.	List of past and upcoming bookings is displayed.	Passed
TC_HB_36	Account & Booking Mgmt	View booking history with no past bookings	REQ-11	Low	StayEase homepage is loaded; for logged-in scenarios, a test account exists.	Log in with a new account; navigate to Booking History.	No bookings yet message is displayed.	Passed
TC_HB_37	Account & Booking Mgmt	Cancel a booking within the allowed cancellation window	REQ-12	High	StayEase homepage is loaded; for logged-in scenarios, a test account exists.	Select an eligible booking; click Cancel; confirm.	Booking is cancelled; refund status updates accordingly.	Passed
TC_HB_38	Account & Booking Mgmt	Attempt to cancel after the cancellation window has passed	REQ-12	Medium	StayEase homepage is loaded; for logged-in scenarios, a test account exists.	Select a booking past the cancellation deadline; click Cancel.	Error: booking can no longer be cancelled.	Passed
TC_HB_39	Account & Booking Mgmt	Modify the dates of an existing booking	REQ-12	Medium	StayEase homepage is loaded; for logged-in scenarios, a test account exists.	Select a booking; change dates; save.	Booking dates are updated, subject to availability.	Passed
TC_HB_40	Account & Booking Mgmt	Attempt to modify a booking that has already been cancelled	REQ-12	Low	StayEase homepage is loaded; for logged-in scenarios, a test account exists.	Select a cancelled booking; attempt to modify dates.	Error: cancelled bookings cannot be modified.	Passed

Requirements sheet — 12 functional requirements grouped by module.

1	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S
1	Test ID	Module	Title	Req ID	Priority	Precondition	Steps	Expected Result	Status										
24	TC_HB_023	Payment & Checkout	Attempt payment with an expired card	REQ-07	High	User has selected a room and reached the checkout page.	Enter a card with a past expiry date; click Pay Now.	Error: card has expired.	Passed										
25	TC_HB_024	Payment & Checkout	Attempt payment with an incorrect CVV	REQ-07	High	User has selected a room and reached the checkout page.	Enter a valid card with wrong CVV; click Pay Now.	Error: payment declined, invalid CVV.	Passed										
26	TC_HB_025	Payment & Checkout	Apply a valid promo code at checkout	REQ-08	Medium	User has selected a room and reached the checkout page.	Enter a valid, active promo code; click Apply.	Discount is applied, total updates correctly.	Passed										
27	TC_HB_026	Payment & Checkout	Apply an expired promo code at checkout	REQ-08	Medium	User has selected a room and reached the checkout page.	Enter an expired promo code; click Apply.	Error: promo code has expired.	Passed										
28	TC_HB_027	Payment & Checkout	Apply a promo code below minimum order value	REQ-08	Medium	User has selected a room and reached the checkout page.	Enter a code requiring a higher order value; click Apply.	Error: minimum order value not met for this code.	Passed										
29	TC_HB_028	Payment & Checkout	Attempt to apply the same promo code twice	REQ-08	Low	User has selected a room and reached the checkout page.	Apply a valid code; attempt to apply it again.	Error: promo code already applied to this booking.	Passed										
30	TC_HB_029	Payment & Checkout	Verify confirmation and invoice after successful payment	REQ-09	High	User has selected a room and reached the checkout page.	Complete a successful payment.	Booking confirmation and invoice are generated and displayed.	Passed										
31	TC_HB_030	Payment & Checkout	Verify no confirmation is generated after a failed payment	REQ-09	High	User has selected a room and reached the checkout page.	Submit payment with an invalid card; observe result.	No booking confirmation or invoice is generated.	Passed										
32	TC_HB_031	Account & Booking Mgmt	Register a new account with valid details	REQ-10	High	StayEase homepage is loaded; for logged-in scenarios, a test account exists.	Enter valid name, email, and password; click Register.	Account is created; user is logged in.	Passed										
33	TC_HB_032	Account & Booking Mgmt	Register with an email already in use	REQ-10	High	StayEase homepage is loaded; for logged-in scenarios, a test account exists.	Enter an email already registered; click Register.	Error: email is already registered.	Passed										
34	TC_HB_033	Account & Booking Mgmt	Log in with valid credentials	REQ-10	High	StayEase homepage is loaded; for logged-in scenarios, a test account exists.	Enter correct email and password; click Login.	User is logged in and redirected to their dashboard.	Passed										

Test Suite sheet — Search & Availability module (TC_HB_001-011).

1	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S
1	Test ID	Module	Title	Req ID	Priority	Precondition	Steps	Expected Result	Status										
13	TC_HB_012	Booking & Reservation	Proceed with all valid guest information	REQ-05	High	User has completed a room search and results are displayed.	Enter valid name, contact, and ID; click Continue.	Booking proceeds to the checkout page.	Passed										
14	TC_HB_013	Booking & Reservation	Attempt booking with guest name left blank	REQ-05	High	User has completed a room search and results are displayed.	Leave name blank; fill rest; click Continue.	Error: guest name is required.	Passed										
15	TC_HB_014	Booking & Reservation	Attempt booking with invalid contact number format	REQ-05	Medium	User has completed a room search and results are displayed.	Enter '123123' as contact number; click Continue.	Error: contact number format is invalid.	Passed										
16	TC_HB_015	Booking & Reservation	Attempt booking with invalid ID/passport format	REQ-05	Medium	User has completed a room search and results are displayed.	Enter an ID number with invalid characters; click Continue.	Error: ID/passport number format is invalid.	Passed										
17	TC_HB_016	Booking & Reservation	Attempt to book a room already reserved for the same dates	REQ-06	High	User has completed a room search and results are displayed.	Select a room another guest just booked for the same dates.	Error: room is no longer available for these dates.	Passed										
18	TC_HB_017	Booking & Reservation	Book the last available room for given dates	REQ-06	Medium	User has completed a room search and results are displayed.	Select the last remaining room; complete guest details.	Booking succeeds; room shows as unavailable to others.	Passed										
19	TC_HB_018	Booking & Reservation	Book multiple rooms in a single reservation	REQ-04	Medium	User has completed a room search and results are displayed.	Select 2 rooms; add both to one reservation; continue.	Both rooms are included in the same reservation.	Passed										
20	TC_HB_019	Booking & Reservation	Attempt booking with guests exceeding room capacity	REQ-04	Medium	User has completed a room search and results are displayed.	Select a 2-guest room; enter 4 guests; continue.	Error: guest count exceeds room capacity.	Passed										
21	TC_HB_020	Booking & Reservation	Cancel a booking in progress before confirmation	REQ-06	Low	User has completed a room search and results are displayed.	Start a booking; click Cancel before payment.	Booking is discarded; room remains available.	Passed										
22	TC_HB_021	Payment & Checkout	Complete payment using a valid credit card	REQ-07	High	User has selected a room and reached the checkout page.	Enter valid card details; click Pay Now.	Payment succeeds; booking is confirmed.	Passed										
23	TC_HB_022	Payment & Checkout	Complete payment using a valid digital wallet	REQ-07	High	User has selected a room and reached the checkout page.	Select wallet option; authorize payment.	Payment succeeds; booking is confirmed.	Passed
