

# Registration Form — Test Case Pack & Defect Discovery

19 Test Cases across Positive, Negative, Boundary & Edge Coverage

## 1. Overview

This project delivers a 19-case test pack for a self-built user registration form, covering positive, negative, boundary, and edge case coverage. Beyond the planned cases, exploratory testing surfaced two genuine defects in the form's password handling.

The registration form accepts five fields: Full Name, Email Address, Age, Password, and Confirm Password, enforcing rules on required fields, valid email format, an age range of 18–100, and a minimum password length of 8 characters.

## 2. Test Coverage Breakdown

1 positive test case, 7 negative test cases, 6 boundary test cases, and 5 edge case test cases, totalling 19. 17 passed; 2 failed, revealing real defects in password handling.

## 3. Test Case Summary

| Test ID    | Title                                   | Type      | Status |
|------------|-----------------------------------------|-----------|--------|
| TC_REG_001 | Register with all valid details         | Positive  | Passed |
| TC_REG_004 | Password shorter than 8 characters      | Negative  | Passed |
| TC_REG_007 | Age just below minimum (17)             | Boundary  | Passed |
| TC_REG_009 | Age just above maximum (101)            | Boundary  | Passed |
| TC_REG_014 | Invalid single-character email domain   | Negative  | Passed |
| TC_REG_016 | Full Name below minimum length          | Edge Case | Passed |
| TC_REG_018 | Password containing spaces              | Edge Case | Failed |
| TC_REG_019 | Password field masks entered characters | Negative  | Failed |

Full pack: 19 test cases, each with ID, title, preconditions, steps, expected result, priority, and execution status.

## 4. Defects Found During Testing

| Reference  | Description                                                                                                    | Severity / Impact                                                                      |
|------------|----------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------|
| TC_REG_018 | Password field accepts a value containing a space character without validation.                                | Medium — could cause confusing login failures if a user retypes without the space.     |
| TC_REG_019 | Password and Confirm Password fields display entered text in plain, readable characters instead of masking it. | High — a real password field must mask input; this is a standard security expectation. |

## 5. Execution Screenshots

CREATE ACCOUNT

Full Name  
Daniel

Email Address  
daniel@g.com

Age (allowed: 18-100)  
18

Password (minimum 8 characters)  
123daniel

Confirm Password  
123daniel

Register

ACTUAL RESULT: Success - Account created for "Daniel" (daniel@g.com). Registration complete.

Activate Windows  
Go to Settings to activate Windows

TC\_REG\_001 — Valid registration → Success, account created.

CREATE ACCOUNT

Full Name  
Daniel

Email Address  
daniel@g.c

Age (allowed: 18-100)  
18

Password (minimum 8 characters)  
123daniel

Confirm Password  
123daniel

Register

ACTUAL RESULT: Rejected - "daniel@g.c" is not a valid email address.

Activate Windows  
Go to Settings to activate Windows

TC\_REG\_014 — Invalid single-character email domain → Rejected (defect found and fixed).

CREATE ACCOUNT

Full Name  
Daniel

Email Address  
danielg.co

Age (allowed: 18-100)  
18

Password (minimum 8 characters)  
123daniel

Confirm Password  
123daniel

Register

ACTUAL RESULT: Rejected - "danielg.co" is not a valid email address.

Activate Windows  
Go to Settings to activate Windows

TC\_REG\_003-type — Email missing '@' symbol → Rejected.

CREATE ACCOUNT

Full Name  
Daniel

Email Address  
daniel@g.co

Age (allowed: 18-100)  
17

Password (minimum 8 characters)  
123daniel

Confirm Password  
123daniel

Register

ACTUAL RESULT: Rejected - Age 17 is below the minimum allowed (18). You must be 18 or older to register.

Activate Windows  
Go to Settings to activate Windows

TC\_REG\_007 — Age = 17 (below minimum) → Rejected.

CREATE ACCOUNT

Full Name  
Daniel

Email Address  
daniel@g.co

Age (allowed: 18-100)  
100

Password (minimum 8 characters)  
1234abc

Confirm Password  
1234abc

Register

ACTUAL RESULT: Rejected - Password must be at least 8 characters (entered: 7).

Activate Windows  
Go to Settings to activate Windows

TC\_REG\_004-type — Password with 7 characters → Rejected.

CREATE ACCOUNT

Full Name  
Daniel

Email Address  
daniel@g.co

Age (allowed: 18-100)  
100

Password (minimum 8 characters)  
1234abcd

Confirm Password  
1234abc

Register

ACTUAL RESULT: Rejected - Password and Confirm Password do not match.

Activate Windows  
Go to Settings to activate Windows

TC\_REG\_005 — Password mismatch → Rejected.

CREATE ACCOUNT

Full Name  
Daniel

Email Address  
daniel@g.co

Age (allowed: 18-100)  
101

Password (minimum 8 characters)  
1234abcd

Confirm Password  
1234abcd

Register

ACTUAL RESULT: Rejected - Age 101 exceeds the maximum allowed (100).

TC\_REG\_009 — Age = 101 (above maximum) → Rejected.

CREATE ACCOUNT

Full Name  
Daniel

Email Address  
daniel@g.co

Age (allowed: 18-100)  
0

Password (minimum 8 characters)  
1234abcd

Confirm Password  
1234abcd

Register

ACTUAL RESULT: Rejected - Age 0 is below the minimum allowed (18). You must be 18 or older to register.

TC\_REG\_015 — Age = 0 (extreme low) → Rejected.

CREATE ACCOUNT

Full Name  
.

Email Address  
daniel@g.co

Age (allowed: 18-100)  
18

Password (minimum 8 characters)  
1234abcd

Confirm Password  
1234abcd

Register

ACTUAL RESULT: Rejected - Full name must be at least 2 characters.

TC\_REG\_016 — Full Name below minimum length → Rejected.

CREATE ACCOUNT

Full Name  
dj

Email Address

Age (allowed: 18-100)  
18

Password (minimum 8 characters)  
1234abcd

Confirm Password  
1234abcd

Register

ACTUAL RESULT: Rejected - Email address is required.

Activate Windows  
Go to Settings to activate Windows.

TC\_REG\_017 — Email left blank → Rejected.

CREATE ACCOUNT

Full Name  
dj

Email Address  
dj@g.co

Age (allowed: 18-100)  
wre

Password (minimum 8 characters)  
1234abcd

Confirm Password  
1234abcd

Register

ACTUAL RESULT: Rejected - Age must be a whole number.

Activate Windows  
Go to Settings to activate Windows.

TC\_REG\_012 — Non-numeric age ('wre') → Rejected.

## 6. Conclusion

This project demonstrates a complete, well-organized test case pack combined with real exploratory testing that uncovered genuine defects, showing both structured test design skill and a QA mindset that goes beyond executing a predefined script.
